GENERAL INFORMATION: Green Light Bioganic® products were developed to provide the user with effective alternatives that are safe for children, pets and the environment. Bioganic® is the result of many years of research into natural pesticides. The active ingredients in these unique, patented formulations are made from plant oils and other ingredients widely used as food and cosmetic additives. These plant oils kill insects by blocking specific neural pathways that don’t exist in mammals or birds. These plant oils attack the Octopamine neurotransmitter. Octopamine is a key insect neurotransmitter that regulates insect movement, behavior and metabolism. The blockage of the receptor activity prevents the transmission of the Octopamine signals which leads to certain characteristic signs of toxicity such as excitation, hyperextension in the hind legs and abdomen, followed by immobilization and/or knockdown, followed by death. This process will begin immediately. Mortality can occur within minutes of application, but may take hours depending on the type of insect pest and concentration of product that contacts the insect directly. Bioganic® can be used up to day of harvest on vegetables and other edible plants.

MAKE ADDITIONAL APPLICATIONS AS NECESSARY. This product has not been registered by the US EPA. Green Light Company represents that this product qualifies for exemption from registration under FIFRA. DIRECTIONS FOR USE: Read Entire Label. Use Strictly In Accordance With Label. SHAKE WELL BEFORE USING. Green Light Bioganic® Organic Insect Control Concentrate is to be diluted at the rate of 8 fl. oz. in 1 gallon of water, or 2 fl. oz. in 1 quart of water. For best results, make applications early in the morning or late afternoon when adult insect pests, such as whiteflies, are normally stationary on the underside of the foliage. Do not apply to wilted or otherwise stressed plants. Care should be exercised in timing applications to early morning/late afternoon to minimize the potential for leaf burn. Use with care on plants with tender tissue.

NOTE: Do not use on carpets, upholstery or other fabrics as staining may occur. Do not use product on or in electrical equipment.

FOR USE IN: Homes, Offices, Schools, and other Buildings (Indoor/Outdoor); Perimeter Treatment around buildings, patios, porches, walkways, garages, and other structures; Vegetable Gardens; Ornamental Beds; Hanging Baskets, Potted Plants, Planter Boxes, and other similar areas. Also for use around Barns, Corrals, Stables, etc., to control flies, fleas, gnats, mosqui- toes, ticks, etc. Food and eating utensils should be removed or covered when this product is used. FOR CONTROL OF THE FOLLOWING INSECT PESTS: Ants, Aphids, Beetles, Caterpillars, Centipedes, Cockroaches, Crickets, Earwigs, Firebrats, Fleas, Flies, Gnats, Grasshoppers, Mealbugs, Millipedes, Mosquitoes, Pillbugs (Snowbugs), Scale, Silverfish, Spiders, Ticks, Whiteflies, and other insect pests. Spray uniformly in areas where insects may be crawling, hiding or living such as: cracks/crevices and areas around walls or fences, cabinets, baseboards, moldings, pipe openings, window and doorframes, and appliances. To help prevent invasion of buildings and other structures by these pests, apply thoroughly and uniformly to the foundation and crawl spaces where pests are active and may find entrance. Apply in a manner to provide complete and uniform coverage of infested plants. Be sure to get good coverage of underside of leaves and main stem. Avoid over-spraying to the point of excessive runoff. Apply directly to insect pests whenever possible. Repeat treatment as necessary.

PRECAUTIONARY STATEMENTS: CAUTION: Avoid getting in eyes and on skin. Avoid breathing spray mists. The product does contain plant oils that are inherently fragrant. When used indoors, or in confined spaces, prolonged expo-sure to the fragrance may be objectionable to some individuals.

FIRST AID: If In Eyes: Wash with water. Consult your physician if irritation persists. If On Skin: Wash with soap and water. Consult your physician if irritation per-sists. If Inhaled: Seek fresh air. If Swallowed: Rinse mouth out with water. Do not induce vomit-ting. Obtain medical attention.

STORAGE AND DISPOSAL: Storage: As with any household chemical product, keep out of reach of children and animals. Keep from freezing (store above 32°F). Disposal: Do not reuse container. Securely wrap empty container in newspaper and discard in trash.

LIMITATION OF LIABILITY: Green Light Company warrants that this material conforms to the chemi-cal description on the label and is reasonably fit for use as directed thereon.
