Supplemental Labeling

EPA Reg. No. 241-299

FOR CONTROL OF WITCHWEED (*Striga lutea*) ON FORESTRY SITES

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE ARSENAL HERBICIDE
APPLICATORS CONCENTRATE LEAFLET LABEL BEFORE USING

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ARSENAL herbicide may be applied on forestry sites for control of witchweed (*Striga lutea*). Apply ARSENAL at rates from 8-16 fl. oz. per acre. Control of witchweed may require repeat applications and/or control of host plant species.

Refer to ARSENAL leaflet label to determine rates of application needed to control host plant species and to obtain directions on mixing, application and use rates for forestry site preparation and release from woody and herbaceous competition.

A postemergence application of ARSENAL herbicide Applicators Concentrate is recommended for control of most annual and perennial grasses and broadleaf weeds, vines and brambles, and woody brush and tree species for forestry site preparation and release from woody and herbaceous competition. ARSENAL may be applied for the control of annual and perennial weeds and brush along non-irrigation ditchbanks and forest roads in forest management areas. ARSENAL may also be used in the establishment and maintenance of wildlife openings.

This label must be in the possession of the user at the time of herbicide application.
