**INERT INGREDIENTS:**

- Hydrogen peroxide .................................................................................................................. 11.2%

**TOTAL** .................................................................................................................................................. 100.0%

**ACTIVE INGREDIENTS:**

- Tsunami 100 ........................................................................................................................................ 88.8%

**DIRECTIONS FOR USE**

1. **FOR PATHOGEN* REDUCTION AND CONTROL IN FRUIT AND VEGETABLE PROCESSING WATERS:**

   - **DIRECTIONS FOR USE**

     1. Ensure that water is mixing in the processing vessel.
     2. Add Tsunami 100 at a rate of 2.5-4.7 fluid ounces per 100 gallons of process water.
     3. Measure the residual peroxyacetic acid concentration in the water using a Test Kit (consult Ecolab Representative) and adjust dose as needed. Allow a 1.5 minute mixing time.

   - **FIRST AID**

     1. If swallowed: Call a poison control center or doctor immediately for treatment advice. If an unconscious person, do not give anything by mouth. If the person is breathing, call a poison control center or doctor for treatment advice.
     2. If splashed into the eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
     3. For skin contact: Wash with soap and water for at least 15 minutes.

   - **KEEP OUT OF REACH OF CHILDREN**

   - **DANGER**

     - Tsunami 100 can be used on the following types of fresh, peel-harvested and processed fruits and vegetables:

       - Corn, barley, oats, rice, wheat, triticale, wild rice, sweet corn
