SANITE 75

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DISINFECTION / VIRUCIDAL / FUNGICIDAL DIRECTIONS: Add 3 1/2 oz of SANITE 75 per 4 1/2 gallons of water (0.78 oz. of SANITE 75 per gallon) (or equivalent dilution) to disinfect hard, nonporous surfaces. Before use in federally inspected meat and poultry food processing plants and dairy, food products and packaging materials must be removed from the room or carefully protected. When used on surfaces in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities, this product is an effective fungicide against Trichophyton mentagrophytes (the athlete’s foot fungus). Apply use-solution with a cloth, mop, sponge, or spray, or by immersion, thoroughly wetting surfaces. For heavily soiled areas, a preliminary cleaning is recommended. For spray applications, use a coarse spray device. Spray - 6 - 8 inches from surface; rub with brush, sponge or cloth. Do not breathe spray. Note: For spray applications, cover or remove all food products. Treated surfaces must remain wet for 10 minutes. Wipe dry with a clean cloth, sponge or mop or allow to air dry. Prepare a fresh solution daily or more often if the solution becomes visibly diluted or soiled. Rinse food contact surfaces such as counters tops, tables, picnic tables, countertops, refrigerated display equipment, dairy equipment, food utensils, dishes, silverware, glasses, sinks, touch points, refrigated storage areas and display equipment and other hard surfaces. Prior to application, remove gross food particles and soil by a pre-flush, pre-scar, or pre-scrap.
