PACE® DUAL ACTION DISPOSABLE FLOATER

KEEP OUT OF REACH OF CHILDREN

DANGER: Contamination may cause fire. Add only to water. See side label for First Aid and Precautions.

FIRST AID: *IF IN EYES:* Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. *IF ON SKIN OR CLOTHING:* Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. *IF SWALLOWED:* Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. **DO NOT induce vomiting unless told to do so by the poison control center or doctor. DO NOT give anything by mouth to an unconscious person. IF INHALED:** Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth if possible. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-654-6911 for emergency medical treatment information. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

ALLOW TO FLOAT

DO NOT SUBMERGE
DO NOT ALLOW
CARTRIDGE TO SINK

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ THE PRECAUTIONARY STATEMENTS BEFORE USE.**

METHOD OF APPLICATION: HTH® Disposable Floaters are designed for simple one time use and treat up to 40,000 gallons of pool water. The 1" tablets inside the floater are formulated to protect pool water against chlorine loss and dissolve slowly providing a steady source of available chlorine for complete swimming enjoyment in your pool. For crystal clear pool water, follow our 4 step pool care program: **Step 1:** Test and adjust pool water balance, **Step 2:** Chlorinate and clarify, **Step 3:** Shock treat your pool at least once a week, and **Step 4:** Add algacide regularly.

WATER BALANCE: To provide optimum product performance, swimmer comfort and crystal clear water always maintain pH from 7.2 to 7.6, total alkalinity from 90 to 125 parts per million (ppm), and calcium hardness above 200 ppm. Test frequently using a reliable test kit that measures all these ranges. Make any necessary adjustments promptly with the appropriate HTH Pool Care Products.

ROUTINE CHLORINATION: DO NOT attempt to open or refill this cartridge. **DO NOT** completely submerge cartridge. Reentry into treated swimming pools is prohibited above levels of 4 ppm of chlorine.

1. To provide optimum product performance, swimmer comfort and crystal clear water, always maintain pH from 7.2 to 7.6, total alkalinity from 90 to 125 parts per

million (ppm) and calcium hardness above 200 ppm. Test frequently using a reliable test kit that measures all of the above ranges. Adjust with appropriate product.

2. Shock treat with appropriate product. Follow label directions.
3. If water is unstabilized, stabilize with appropriate product. Follow label directions.
4. This product is marked in gallon increments from 5,000 to 40,000 gallons. To use this cartridge, punch out all feeder holes on both sides of cartridge up to and including the one corresponding to your pool's size. If pool is between sizes marked, punch out next higher hole. Make sure holes are punched out to allow free water flow through cartridge.
5. Punch out vent holes on both sides of cartridge. Place cartridge in pool. An eyelet has been provided on the cartridge so that you may secure it in the middle of the deep end of the pool if you desire.
6. Maintain free chlorine residual between 1-4 ppm. If chlorine is too low, punch out an additional hole on each side of the cartridge. If the chlorine is too high, seal one hole on each side of the cartridge with water-proof plastic tape. If the chlorine is too high, and your pool volume is 10,000 gallons or less, you may need to seal the vent holes also.
7. The cartridge will float on its side to indicate the need for replacement. **DO NOT ATTEMPT TO OPEN OR REFILL THIS CARTRIDGE!**

SHOCK TREATMENT: Adjust pH to 7.2 to 7.4 with HTH pH Plus® or HTH pH Minus per label directions. Shock treat weekly with a product such as HTH Super Chlorinator & Shock Treatment to kill bacteria, control algae, burn out organic material and to keep water sparkling clear. Follow label directions.

ALGAE CONTROL: If pool surface develops algae or feels slippery, follow shock treatment directions. Immediately after shock treatment, thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. If necessary, repeat the procedure. Pool should not be entered until the chlorine residual is 1-4 ppm.

OPENING YOUR POOL: Balance pool water, shock treat, and stabilize your pool using HTH Stabilizer and Conditioner. Then follow "ROUTINE CHLORINATION" directions.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry well-ventilated area way from heat or open flame. **DO NOT** reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS – DANGER: CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. **DO NOT** breath dust or spray mists. Irritating to nose and throat. Harmful if swallowed. **DO NOT** get in eyes, on skin,

or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash separately before reuse. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

CHEMICAL HAZARDS: DANGER – STRONG OXIDIZING AGENT. Use only clean, dry utensils. Add only into water. **CONTAMINATION WITH MOISTURE, DIRT, ORGANIC MATTER OR OTHER CHEMICALS MAY START A CHEMICAL REACTION WITH GENERATION OF HEAT, LIBERATION OF HAZARDOUS GASES AND POSSIBLE FIRE AND/OR EXPLOSION.** Avoid any contact with flaming or burning material. **DO NOT** use this product in any chlorinating device which has been used with any product other than trichloro-s-triazinetrione tablets or sticks as the active ingredient. Such use may cause fire or explosion. **ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms.

EMERGENCY HANDLING: In case of contamination or decomposition

- **DO NOT** reseal container.
- Immediately remove container to an open and well-ventilated outdoor area by itself.
- Flood with large amounts of water.
- Dispose of the container and any remaining contaminated material in an approved landfill area.

**IN CASE OF EMERGENCY
CALL: 1-800-654-6911.**
