1. PRODUCT AND COMPANY IDENTIFICATION:

PRODUCT: Snapshot* 2.5G Herbicide

COMPANY IDENTIFICATION:
Dow AgroSciences
9330 Zionsville Road
Indianapolis, IN 46268-1189

This document is prepared pursuant to the OSHA Hazard Communication Standard (29 CFR 1910.1200). In addition, other substances not ‘Hazardous’ per this OSHA Standard may be listed. Where proprietary ingredient shows, the identity may be made available as provided in this standard.

3. HAZARDOUS IDENTIFICATIONS:

EMERGENCY OVERVIEW
Hazardous Chemical. Yellow free-flowing granule with slight aromatic odor. May cause moderate eye irritation with slight corneal injury. Prolonged or repeated exposure may cause skin irritation. The LD$_{50}$ for skin absorption in rabbits is >5000 mg/kg; oral LD$_{50}$ for rats is >2500 mg/kg; inhalation LC$_{50}$ for rats is >4.6 mg/L (males) and 0.5 to 4.6 mg/L (females) for 4 hours. Toxic to fish and aquatic organisms.

EMERGENCY PHONE NUMBER: 800-992-5994

POTENTIAL HEALTH EFFECTS: This section includes possible adverse effects which could occur if this material is not handled in the recommended manner.

EYE: May cause moderate eye irritation with slight corneal injury.

SKIN: Prolonged exposure may cause slight skin irritation. A single prolonged exposure is not likely to result in the material being absorbed through skin in harmful amounts. Did not cause allergic skin reactions when tested in guinea pigs. The LD$_{50}$ for skin absorption in rabbits is >5000 mg/kg.

INGESTION: The single dose oral toxicity is low. The oral LD$_{50}$ for rats is >2500 mg/kg. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; swallowing amounts larger than that may cause injury.

INHALATION: Excessive exposure may cause irritation to upper respiratory tract. The LC$_{50}$ is >4.6 mg/L for male rats and between 0.5 and 4.6 mg/L for female rats for four hours.

SYSTEMIC (OTHER TARGET ORGAN) EFFECTS:
Contains isoxaben, which, in animals, effects have been reported on the following organs: kidney and liver. Repeated excessive exposure to crystalline silica may cause silicosis, a progressive and disabling disease of the lungs. Some evidence suggests that kidney effects may result from excessive exposures also.

CANCER INFORMATION: This mixture contains crystalline silica, which is listed as a carcinogen for hazard communication purposes under OSHA Standard 29 CFR 1910.1200. Crystalline silica is listed by IARC and NTP. A low incidence of urinary tract tumors were seen with trifluralin in one strain of rat in 1 of 5 2-year studies conducted. Trifluralin is not anticipated to be a carcinogenic risk in man. An increase in non-malignant liver tumors was seen with isoxaben in one of two species tested. Crystalline silica has been shown to cause cancer in laboratory animals and humans.

TERATOLOGY (BIRTH DEFECTS): Trifluralin did not cause birth defects in animal tests; other fetal effects occurred only at doses toxic to the mother.

REPRODUCTIVE EFFECTS: Isoxaben has been shown to interfere with reproduction in animal studies.
4. FIRST AID:

**EYES**: Irrigate with flowing water immediately and continuously for 15 minutes. Consult medical personnel.

**SKIN**: Wash off in flowing water or shower.

**INGESTION**: If swallowed, seek medical attention. Do not induce vomiting unless directed to do so by medical personnel.

**INHALATION**: Remove to fresh air if effects occur. Consult a physician.

**NOTE TO PHYSICIAN**: No specific antidote. Supportive care. Treatment based on judgment of the physician in response to reactions of the patient.

5. FIRE FIGHTING MEASURES:

**FLASH POINT**: Not applicable

**METHOD USED**: Not applicable

**FLAMMABLE LIMITS**
- LFL: Not applicable
- UFL: Not applicable

**AUTO-IGNITION TEMPERATURE**: Does not ignite up to 1000°F (537°C).

**EXTINGUISHING MEDIA**: Use water fog, CO₂ or dry chemicals.

**FIRE AND EXPLOSION HAZARDS**: Will emit toxic vapors during combustion.

**FIRE-FIGHTING EQUIPMENT**: Wear full protective clothing and use positive-pressure, self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES:

**ACTION TO TAKE FOR SPILLS**: Contain and sweep up material of small spills and dispose as waste. Report large spills to Dow AgroSciences at 800-992-5994. Prevent runoff.

7. HANDLING AND STORAGE:

**PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE**:

**HANDLING**: Keep out of reach of children. Harmful if swallowed or inhaled. Causes eye irritation. Avoid contact with eyes, skin and clothing. Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

**STORAGE**: Store in original container. Keep tightly closed when not in use. See product label for handling/storage precautions relative to the end use of this product.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION:

These precautions are suggested for conditions where a potential for exposure exists. Emergency conditions may require additional precautions.

**EXPOSURE GUIDELINE(S)**:

Crystalline Silica: ACGIH Threshold Limit Value (TLV) is 0.1 mg/M³ (respirable) for quartz, tripoli and fused silica; 0.05 mg/M³ (respirable) for cristobalite and tridymite.

OSHA Permissible Exposure Limit (PEL) is 100% SiO₂ + 2 mg/M³ (respirable) for quartz, tripoli and fused silica; ½ the value calculated from the respirable dust formula for quartz for cristobalite and tridymite.

PELs are in accord with those recommended by OSHA, as in the 1989 revision of PELs.

**ENGINEERING CONTROLS**: Good general ventilation should be sufficient for most conditions. Local exhaust ventilation may be necessary for some operations.

**RECOMMENDATIONS FOR MANUFACTURING, COMMERCIAL BLENDING, AND PACKAGING WORKERS**:

**RESPIRATORY PROTECTION**: Atmospheric levels should be maintained below the exposure guideline. If respiratory irritation is experienced, use a NIOSH approved air-purifying respirator.

**SKIN PROTECTION**: Use gloves impervious to this material when prolonged or frequently repeated contact could occur.

*Trademark of Dow AgroSciences*
SNAPSHOT* 2.5G HERBICIDE

EYE/FACE PROTECTION: Use chemical goggles.

APPLICATORS AND ALL OTHER HANDLERS: Please refer to the product label for personal protective clothing and equipment.

9. PHYSICAL AND CHEMICAL PROPERTIES:

BOILING POINT: Not applicable
VAPOR PRESSURE: Not applicable
VAPOR DENSITY: Not applicable
SOLUBILITY IN WATER: Not applicable
SPECIFIC GRAVITY: Not applicable
BULK DENSITY: 39-42 lbs/cu.ft.
APPEARANCE: Yellow free flowing granule
ODOR: Mild aromatic odor
pH: (aqueous 50/50) 7.0 to 8.0

10. STABILITY AND REACTIVITY:

STABILITY: (CONDITIONS TO AVOID) Stable under normal conditions.

INCOMPATIBILITY: (SPECIFIC MATERIALS TO AVOID) None known

HAZARDOUS DECOMPOSITION PRODUCTS: Nitrogen oxides and other toxic vapors may be formed if product is involved in fire.

HAZARDOUS POLYMERIZATION: Not known to occur.

11. TOXICOLOGICAL INFORMATION:

MUTAGENICITY: Animal mutagenicity studies were negative for isoxaben and trifluralin. For silica, in vitro mutagenicity studies were negative in some cases and positive in other cases.

12. ECOLOGICAL INFORMATION:

ENVIRONMENTAL DATA: MOVEMENT & PARTITIONING:
Based on information for trifluralin. Bioconcentration potential is moderate (BCF between 100 and 3000 or Log Pow between 3 and 5).
Based on information for isoxaben. Bioconcentration potential is low (BCF <100 or Log Pow <3).

DEGRADATION & PERSISTENCE:
Based on information for trifluralin. Based on the stringent test guidelines, this material cannot be considered as readily biodegradable; however, these results do not necessarily mean that the material is not biodegradable under environmental conditions. Based on information for isoxaben. The photolysis half-life in water is 6 days. The photolysis half-life in soil is 248 days. Under aerobic soil conditions the half-life is 4.3-10.6 months.

ECOTOXICOLOGY:
Based on information for trifluralin. Material is very highly toxic to aquatic organisms on an acute basis (LC₅₀/EC₅₀ <0.1 mg/L in most sensitive species). Based on information for isoxaben. Not expected to be acutely toxic. EC₅₀ is above the water solubility.

13. DISPOSAL CONSIDERATIONS:

DISPOSAL METHOD: Improper disposal of excess pesticide is a violation of Federal law. If these wastes cannot be disposed by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

14. TRANSPORT INFORMATION:

For DOT regulatory information, if required, consult transportation regulations, product shipping papers, or consult your Dow AgroSciences representative.

15. REGULATORY INFORMATION:

NOTICE: The information herein is presented in good faith and believed to be accurate as of the effective date shown above. However, no warranty, express or implied, is given. Regulatory requirements are subject to change and may differ from one location to another; it is the buyer’s responsibility to ensure that its activities comply with federal, state or provincial, and local laws. The following specific information is made for the purpose of complying with numerous federal, state or provincial, and local laws and regulations.

</table>

SARA HAZARD CATEGORY: This product has been reviewed according to the EPA "Hazard Categories" promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

An immediate health hazard
A delayed health hazard

TOXIC SUBSTANCES CONTROL ACT (TSCA): All ingredients are on the TSCA inventory or are not required to be listed on the TSCA inventory.

STATE RIGHT-TO-KNOW: The following product components are cited on certain state lists as mentioned. Non-listed components may be shown in the composition section of the MSDS.
