Enviro Care Neutral Disinfectant is a multi-purpose, neutral pH, gemisical detergent and disinfectant effective in hard water up to 400 ppm (calculated as CaCO₃) in the presence of a moderate amount of soil (3% organic matter) according to the ACDA Use-Glution test. Dishes, clothes and dishtowels in one labor-saving step. Effective against the following pathogens:

**Bacteria:**
- Salmonella typhi
- Proteus vulgaris
- Proteus mirabillis
- Legionella pneumophila
- Enterococcus faecalis-
- Enterobacter aerogenes
- Staphylococcus
- Community Associated aureus - [CA-MRSA] (NRS384)
- Staphylococcus
- Community Associated Bordetella bronchiseptica
- Pseudomonas aeruginosa

**Viruses:**
- SARS Associated Coronavirus
- Rotavirus [WA]
- Herpes Simplex Virus Type 1
- Hepatitis C Virus (HCV)
- Adenovirus Type 7 - at resistant - (VISA)
- Equine Herpes Virus Type 1
- Newcastle Disease
- Avian polyomavirus
- Rabies
- *Feline panleukopenia
- *Rhinotracheitis
- *Feline infectious peritonitis

**Protozoa:**
- *Giardia lamblia
- *Cryptosporidium

**Fungi:**
- *Mucor
- *Aspergillus
- *Penicillium
- *Mold

**Rickettsia:**
- *Rickettsia typhi

**Additional Information:**
- This product is particularly suitable for use in water damage restoration situations against odor causing bacteria and fungi.
- Will not affect the effectiveness of pH neutral ozone generators.
- This product is effective against mold, fungi, bacteria and viruses in health care settings or other settings in which there is an expected likelihood of exposure to these pathogens.
- This product is not designed to control mold growth on surfaces.
-見える

**Institutional Group**

**ENVIRO CARE® NEUTRAL DISINFECTANT**
One-Step Disinfectant Geminicidal Detergent and Deodorant

**Disinfectant**

- S Ironically, salmonella poisoning (raw eggs) is the leading cause of foodborne illness in the U.S., affecting approximately 1 million people each year. People are most likely to become sick by eating undercooked or unpasteurized eggs, raw or slightly cooked egg dishes, or foods containing raw or undercooked eggs. Salmonella can also be transmitted through the handling of contaminated food, water, and objects. To prevent the spread of salmonella, wash your hands thoroughly with soap and water after handling potentially contaminated food or objects. Refrigerate food promptly, and cook eggs thoroughly to an internal temperature of 160°F (71°C).

- Salmonella is a type of bacteria that can cause foodborne illness. Symptoms include fever, diarrhea, and abdominal pain. Prevention involves cooking eggs and other foods thoroughly, handling foods safely, and washing hands frequently. Cook eggs to an internal temperature of 160°F (71°C) to kill salmonella. Use separate cutting boards, knives, and utensils for raw and cooked foods, and wash them thoroughly after use to prevent cross-contamination.

- **Precautionary Statements**
- **HAZARDS TO HUMANS AND DOMESTIC ANIMALS**
- Keep out of reach of children.
- Corrosive. Causes irreversible eye damage. Do not get in eyes or clothing. Wear protective equipment when using this product.

**Net Contents:**
1 gallon (3.8 liters)

**Precautions**
- Avoid contact with eyes. Wash thoroughly with soap and water after exposure.
- Do not use on non-disposable contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- If ingested, flush mouth and gargle with water. Seek medical advice if symptoms persist.
- If inhaled, move to fresh air. If not improved, seek medical advice.
- If in contact with the skin, wash immediately with soap and water. Seek medical advice if symptoms persist.
- Rinse with plenty of water for 15 minutes. Remove contaminated clothing and wash skin with soap and water. Seek medical advice if symptoms persist.

**Special Instructions for Cleaning Carpet Against Odor Causing Bacteria:**
- Saturate all affected areas and surfaces of facilities occupied or traversed by animals. Empty all feeding and watering appliances. Remove all litter, droppings and manure from floors, walls, instruments, cages, kennels, stables, catteries, etc. Remove all animals and feeds from premises, animal transportation vehicles, crates, etc. Remove all animal manure. Wipe or allow to air dry. Ventilate buildings and other closed spaces. Thoroughly scrub all surfaces that come into contact with these products using an approved hard surface cleaner, such as Alcalase®. Do not house animals or employ equipment that could become contaminated with animal manure. Use in dry, dust-free or smoke-free environments.

**Storage and Disposal**
- Do not combine with other household cleaning agents. Place in original container in areas inaccessible to children and pets. Place in original container in a secure area.

**Pesticide Disposal:**
- Container Disposal: Disposal of Empty Container:
- Open dumping is prohibited. Store in original container in areas inaccessible to children and pets. Disposal:
- Pesticide waste on or around contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Do not get in eyes or clothing. Wear protective equipment when using this product.

**First Aid:**
- IF IN EYES: Wash out with large amounts of water, looking back and forth, until treatment has been absorbed, set or dried.

**Toilet Guardian: Cellulose and carboxymethyl cellulose are effective against odor-causing bacteria and fungi.**
