TEMIK® brand 15G Aldicarb Pesticide

For Use on Flue-Cured Tobacco

EPA Reg. No. 264-330

EPA SLN. No. NC-780021

24(c) Supplemental Label

RESTRICTED USE PESTICIDE

For Retail Sale to and Use Only by Certified Applicators or Persons Under Their Direct Supervision and only for those Uses covered by the Certified Applicator's Certification

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF NORTH CAROLINA

DIRECTIONS FOR USE:

It is a violation of Federal and State Law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. All applicable directions, restrictions, and precautions on the EPA registered label must be followed.

PLANT RESPONSE PRECAUTIONS:

Under certain adverse weather conditions (e.g., high temperatures and/or dry weather) chlorosis and flecking of transplant leaves may occur. Symptoms may be more severe on greenhouse-grown transplants. Placement of transplant roots directly into a band narrower than recommended may result in phytotoxicity. If injury of this type is a concern, do not use this product.

Crop & Time of Application	Pests Controlled	Pounds/Acre	Ounces Per 1000 Feet of Row	Recommended Application
For 42-48" Row Spacing				
TOBACCO (Flue-Cured Only): From one week before transplanting to immediately prior to transplanting. Do Not Apply After Transplanting.	Aphids Flea beetles* (suppression) Nematodes	20 (Based on 48" row spacing)	30	Apply granules as overall broadcast, incorporate 2 to 4 inches into soil followed by pulling soil from middles to form beds. Transplant into treated area.
				OR Apply granules in a 14-inch band, and incorporate thoroughly within the bed during bed preparation. Transplant into treated area.

* Early season flea beetle suppression can be expected from a treatment for control of aphids and nematodes.
