Di-Syston[®] 8 Emulsifiable Systemic Insecticide
For Use on Asparagus to Control Asparagus Aphids.

EPA Reg. No. 264-734
SLN. No. NC-860005

24(c) Supplemental Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF NORTH CAROLINA

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

Do not apply this product through any type of irrigation system.

CROP	PEST	DOSAGE DI-SYSTON 8	REMARKS
Asparagus	Asparagus Aphid	1 pt/A	Apply specified dosage to fern stage of asparagus when aphid infestation appears. Apply in sufficient water for thorough coverage of foliage; a minimum of 5 gallons of water per acre by aircraft or 20 gallons per acre by ground.

Restrictions:

- Do not apply more than twice per season.
- Do not enter or allow workers to enter into treated areas during the restricted entry intervals (REI). The REI for foliar applications to asparagus is 7 days, but is increased to 11 days in areas where the average annual rainfall is less than 25 inches per year.

Note: information on average annual rainfall for your area is available from any nearby weather bureau, such as one affiliated with the National Oceanographic and Atmospheric Administration. Information on average rainfall is also available on-line through the National Weather Service at <http://www.nws.noaa.gov>

- Allow at least 6 months between last application and harvest.
- Do not apply to asparagus grown for seed.
- Do not apply when bees are in the field. Application must be made in the evening after bees have ceased flying for the day.
- For aerial application, human flaggers are prohibited. Use mechanical flaggers or global positioning system (GPS) equipment.
