Houseplant Special
15-30-15
is our traditional indoor
houseplant fertilizer designed for
use on all foliage and flowering
plants. Professional growers prefer
the 1-2-1 ratio fertilizer used for
over 50 years to keep indoor grown
plants vigorous and green. Great for
long term plants! Used in a constant
feed system, it keeps the nutrient
levels constant preventing nutrient
stress from over or under feeding.
This product can also be used out-
doors as a transplant solution and
as a blossom booster for all flower-
ing plants.

HOW TO USE:

For Indoor plants: 1/2 Teaspoon per gallon of water every other week or 1/4
Teaspoon per gallon every time you water your plants. Our handy measuring spoon and detailed instructions pamphlet are enclosed.

Net WT 8 OZ (227g)
