

ACCELERON® B-300 SAT

Acceleron® B-300 SAT is a biological seed applied technology.

MINIMUM GUARANTEED ANALYSIS

ACTIVE: 3×10^9 cfu *Penicillium bilaii* per gram

INERT: flowable liquid

How it works

The active ingredient in Acceleron B-300 SAT enhances the soil microbial environment to support the plant's nutritional availability, supporting the growth and yield potential of the crop.

WARNING

Causes serious eye irritation.

Applicators and other handlers

Wash thoroughly after handling. Wear eye/face protection. If there is potential for contact, wear chemical goggles. For normal use must wear long sleeve shirt, long pants, shoes, and socks. No special respiratory protection is required when used as recommended. If there is significant potential for contact, wear face shield and wear chemical resistant clothing/footwear.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage and handling

The active ingredient in Acceleron B-300 SAT is a living organism and requires specific storage conditions to ensure viability and product performance. Store Acceleron B-300 SAT containers and seed to which Acceleron B-300 SAT has been applied in a cool facility away from sunlight and direct heat sources. Avoid freezing and minimize temperature fluctuations. Shake well before use. Open container only when ready to use. Use before expiration date. The expiration date is valid only for unopened containers stored according to the storage conditions listed above.

Acceleron B-300 SAT product has a shelf-life of 1 year in the container, and a shelf-life of up to 7 days after opening the container with proper storage.

Seed must be planted within 24 months of treatment and treated seed must be stored in cool, dry conditions.

Disposal

Unused Acceleron B-300 SAT and unplanted seed to which Acceleron B-300 SAT has been applied should be disposed of in accordance with applicable federal, state and local requirements.

Directions for use

Always read and follow the instructions on label.

Table 1. Application rate for corn

To Treat	Amount of Inoculant
80,000 kernels	0.09 fl. oz.
100 lbs of seed (1600 seeds/lb.)	0.18 fl. oz.
100 kg of seed (3520 seeds/kg)	11.7 mL

DO NOT TANK MIX with other seed treatment products. Must be applied separately, but can be applied simultaneously with other seed treatment products from a dedicated tank.

Acceleron B-300 SAT may be applied without dilution, but dilution may be necessary to ensure complete coverage of the seeds being treated. Dilute as needed to achieve total volumes suitable for the application equipment utilized. Dilution may be achieved by using water; first add the water to the tank, turn on the tank agitation system and then slowly add the Acceleron B-300 SAT. Provide good tank agitation during use.

Limited warranty

The Seller warrants that this product contains a minimum concentration of *Penicillium bilaii* as specified on this label. The Seller makes no other warranty expressed or implied as to product viability or performance since product storage, use and growing conditions are beyond the Seller's control. Seller's guarantee is limited to the terms set out on the label and subject thereto. Buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition. If this product does not perform as warranted above, and to the extent consistent with applicable law, customer's sole remedy for breach of warranty shall be replacement of the product or refund of the purchase price paid, at the option of Monsanto Company.

EXCEPT AS PROVIDED ELSEWHERE IN WRITING CONTAINING AN EXPRESSED REFERENCE TO THIS WARRANTY AND LIMITATION OF DAMAGES, SELLER MAKES NO OTHER EXPRESSED OR IMPLIED WARRANTY OR GUARANTEE TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, INCLUDING ANY OTHER EXPRESSED OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO.
