1. Identification

1.1. Product identifier

Product Identity: Pocket Gopher Bait, Strychnine on Milo
Alternate Names: USEPA Reg # 4271-17

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use: See Technical Data Sheet.
Application Method: See Technical Data Sheet.

1.3. Details of the supplier of the safety data sheet

Company Name: R&M Exterminators, Inc.
24212 S. D Street
Cheney, Washington 99004

Emergency
CHEMTREC (USA) (800) 424-9300
Customer Service: R&M Exterminators, Inc. (509) 239-4411

2. Hazard(s) identification

2.1. Classification of the substance or mixture

Acute Tox. 4;H302 Harmful if swallowed.
Acute Tox. 3;H311 Toxic in contact with skin.

2.2. Label elements

Using the Toxicity Data listed in section 11 and 12 the product is labeled as follows.

Danger

H302 Harmful if swallowed.
H311 Toxic in contact with skin.

[Prevention]:
P264 Wash thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
3. Composition/information on ingredients

There are no ingredients in this product which are in a concentration above the GHS cutoff. Contains active ingredient Strychnine (CAS Number 57-24-9) at 0.5%

4. First aid measures

4.1. Description of first aid measures

General
In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.

Inhalation
Remove to fresh air, keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious place in the recovery position and obtain immediate medical attention. Give nothing by mouth.

Eyes
Irrigate copiously with clean water for at least 15 minutes, holding the eyelids apart and seek medical attention.

Skin
Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser.

Ingestion
If less than ten (10) minutes have passed since the poison was taken, give or 2 glasses of water and induce vomiting by touching back of the throat with finger. Repeat until vomit fluid is clear. Have patient lie down in a quiet, darkened room and keep him warm and quiet. If person is unconscious, do not give anything by mouth and do not induce vomiting.

4.2. Most important symptoms and effects, both acute and delayed

Overview
DANGER:
Convulsive Poison! Fatal if swallowed or inhaled. Harmful if absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin. Do not breathe dust. Do not apply this product in a way that will contact any person or pet. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.
Note to Physician:
A. Administer 100% OXYGEN by positive pressure to provide as much pulmonary gas exchange as possible, despite seizures.
B. Administer ANTICONVULSANT DRUGS intravenously to control convulsions.
NOTICE: It may be difficult or impossible to stop the seizure activity without stopping respiration. Be prepared to maintain pulmonary ventilation mechanically. Tracheotomy may be necessary if seizures are prolonged.

See section 2 for further details.

Skin
Toxic in contact with skin.

Ingestion
Harmful if swallowed.

5. Fire-fighting measures

5.1. Extinguishing media
Recommended extinguishing media; alcohol resistant foam, CO₂, powder, water spray.
Do not use; water jet.

5.2. Special hazards arising from the substance or mixture
Hazardous decomposition: No hazardous decomposition data available.

5.3. Advice for fire-fighters
When heated, strychnine emits highly toxic fumes, thus firefighters must wear self-contained breathing apparatus.

ERG Guide No. ----

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
Put on appropriate personal protective equipment (see section 8).

6.2. Environmental precautions
This product is toxic to fish, birds and other wildlife. Do not allow bait to be exposed on soil surface. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning or equipment, or disposal of wastes.
Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

6.3. Methods and material for containment and cleaning up
Sweep up spilled materials completely and either use according to label directions or take to an approved pesticide disposal site in a sealed container.

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or reinstate is a violation of Federal law. If these wastes cannot be disposed of by label instructions, contact your State Pesticide or Environment Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
7. Handling and storage

7.1. Precautions for safe handling
Non-refillable container. Do not reuse or refill this container. Offer to recycling, if available. Completely empty bag by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of bags in a sanitary landfill or by incineration if allowed by state and local authorities.
See section 2 for further details. - [Prevention]:

7.2. Conditions for safe storage, including any incompatibilities
Handle containers carefully to prevent damage and spillage.
Incompatible materials: No data available.
Store only in original container, in a dry place inaccessible to children, pets and domestic animals.
See section 2 for further details. - [Storage]:

7.3. Specific end use(s)
Keep away from children and pets.

8. Exposure controls and personal protection

8.1. Control parameters
There are no ingredients in this product which are in a concentration above the GHS cutoff. Contains active ingredient Strychnine (CAS Number 57-24-9) at 0.5%
Strychnine has an OSHA PEL of 0.15 mg/m3 (TWA) and ACGIH TLV of 0.15 mg/m3 (TWA)

8.2. Exposure controls
Respiratory If workers are exposed to concentrations above the exposure limit they must use the appropriate, certified respirators. MSHA/NIOSH approval # prefix TC-21C or NIOSH w/ N,P,R,HE filter.
Eyes Safety Goggles
Skin Wear long sleeved shirts, pants, shoes with socks, and rubber gloves.
Engineering Controls Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.
Other Work Practices Follow manufacturer’s instructions for cleaning and maintaining PPE. If there are no such instructions, use detergent and hot water. Keep and wash PPE separately from other laundry Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

See section 2 for further details. - [Prevention]:

9. Physical and chemical properties

Appearance | Green Solid
Odor | Slight smell of anise oil
Odor threshold | Not Measured
pH | Not Measured
Melting point / freezing point | Not Measured
Initial boiling point and boiling range | 518°F
Flash Point | Not Measured
Evaporation rate (Ether = 1) | Not Measured
Flammability (solid, gas) | Not Applicable
Upper/lower flammability or explosive limits

| Lower Explosive Limit: Not Measured |
| Upper Explosive Limit: Not Measured |
Vapor pressure (Pa) | Not Measured
Vapor Density | Not Measured
Specific Gravity | Not Measured
Solubility in Water | Insoluble
Partition coefficient n-octanol/water (Log Kow) | Not Measured
Auto-ignition temperature | Not Measured
Decomposition temperature | Not Measured
Viscosity (cSt) | Not Measured
Bulk Density | 5.5 lbs/gal

9.2. Other information
No other relevant information.

10. Stability and reactivity

10.1. Reactivity
Hazardous Polymerization will not occur.

10.2. Chemical stability
Stable under normal circumstances.

10.3. Possibility of hazardous reactions
No data available.

10.4. Conditions to avoid
Excessive heat and open flame.

10.5. Incompatible materials
Compatible with most materials.

10.6. Hazardous decomposition products
May occur when bait is heated or burned.
11. Toxicological information

Acute toxicity

There are no ingredients in this product which are in a concentration above the GHS cutoff. Contains active ingredient Strychnine (CAS Number 57-24-9) at 0.5%
Strychnine has an oral LD50 of 16 mg/kg (rat)

The lethal dose to man is 30-60 mg/kg of strychnine, equivalent to one gram of bait per kilogram of body weight.

Note: When no route specific LD50 data is available for an acute toxin, the converted acute toxicity point estimate was used in the calculation of the product's ATE (Acute Toxicity Estimate).

12. Ecological information

12.1. Toxicity

The preparation has been assessed following the conventional method of the Dangerous Preparations Directive 1999/45/EC and GHS and is not classified as dangerous for the environment, but contains substance(s) dangerous for the environment. See section 3 for details.

Aquatic Ecotoxicity

There are no ingredients in this product which are in a concentration above the GHS cutoff. Contains active ingredient Strychnine (CAS Number 57-24-9) at 0.5%
Strychnine is expected to be very toxic to aquatic and terrestrial life.
The LC50/96 hour values for fish are less than 1 mg/l
12.2. Persistence and degradability
There is no data available on the preparation itself.

12.3. Bioaccumulative potential
Not Measured

12.4. Mobility in soil
No data available.

12.5. Results of PBT and vPvB assessment
This product contains no PBT/vPvB chemicals.

12.6. Other adverse effects
No data available.

13. Disposal considerations

13.1. Waste treatment methods
Observe all federal, state and local regulations when disposing of this substance.

14. Transport information

This product is not regulated by DOT; Freight Class Number is 77.5.

15. Regulatory information
