Gro-Well Lawn Fertilizer plus Pre-Emergent Weed Control Season-Long Formula 9-0-0

Gro-Well Lawn Fertilizer & Pre-Emergent Weed Control Season-Long Formula nourishes grass as well as preventing weeds from germinating. Used from early spring through the fall growing season, Gro-Well Lawn Fertilizer provides a long-term release feeding program lasting 8-10 weeks and prevents seeds from germinating and growing! Plus because it's 100% natural, it's better for you and the environment.

One Product for Both Fertilizing and Weed Control

Gro-Well Lawn Fertilizer & Pre-Emergent Weed Control Season-Long Formula is a dual purpose, 100% natural fertilizer. When applied at the recommended rate level 1, it will feed your lawn for over two months. When applied at higher rates, levels 2 or 3, it will feed your lawn and also provide pre-emergent weed control. Application at the higher rates of level 2 or 3 will provide longer sustained feeding over the course of a season. And, used as directed, this product will not burn your lawn.

Rate Level 1.

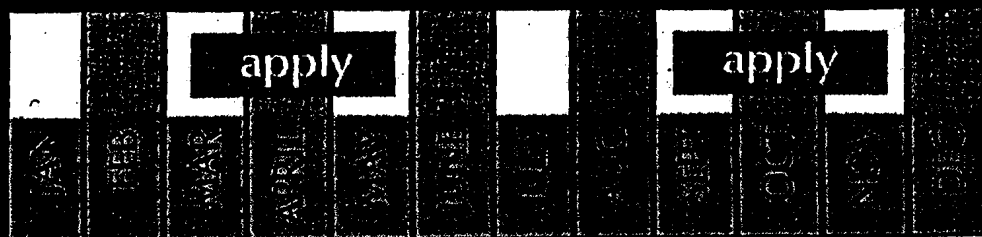

For use as a Spring fertilizer Gro-Well Lawn Fertilizer & Pre-Emergent Weed Control should be applied at a rate of 34 lbs./2500 square feet.

Rate Level 2.

For control of crabgrass, moderate pre-emergent control of broadleaf weeds and better fertilization an application rate of 34 lbs./1500 square feet is recommended. For optimum pre-emergent weed control Gro-Well Lawn Fertilizer & Pre-Emergent Weed Control must be applied in early Spring.

Rate Level 3.

For highest level of pre-emergent crabgrass and broadleaf weed control and superior extended fertilization an application rate of 34 lbs./1000 square feet is recommended. For optimum pre-emergent weed control Gro-Well Lawn Fertilizer & Pre-Emergent Weed Control must be applied in early Spring.

P 2 of 4

Spreader Model	Rate 1	Rate 3
Model 1	5.25	18x2
Model 2	3.25	18x2
Model 3	18	23x3
Model 4	6.5 x 2	10x3
Model 5	3.5	6x3
Model 6	6.5 x 2	10x3

Spreader manufacturers change their models year to year; please check with the manufacturer of your spreader to make sure of the correct settings.

Application Rate: Level 1 : 34lbs./2500 square feet
 Level 2 : 34lbs./1500 square feet
 Level 3 : 34lbs./1000 square feet

Storage And Handling:

Close over bag after use. This product should be stored in a dry area.

**Gro-Well Fertilizer. Safer for You.
 Better for Your Lawn. Greener for Our World.**

There are chemical fertilizers. And then there's a better way. If you're reading this bag, you're probably making a decision. Perhaps some facts will help. Gro-Well fertilizer is a natural based fertilizer made from the by-products of processed corn. A combination of botanical nutrients which also acts as a pre-emergent weed control, it's the perfect combination for long-term greening and a weed free lawn. But unlike 100% chemical fertilizers, that's just the beginning of the benefits. Think of Gro-Well fertilizers as a long acting, nutritious, and beneficial meal for your lawn that continues to feed and nourish up to 8 long weeks -- or more.

We get to the root of the problem. And we solve it.

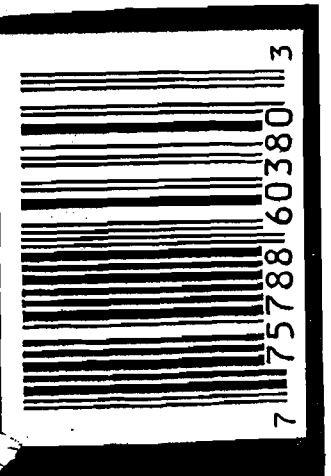

Chemical fertilizers create a lawn that's equivalent to a person who looks good on the outside, but falls short right beneath the surface. These products are high in nitrogen and prone to the problem of run off, so most of their benefits are washed away. What's more, they drain the soil of necessary biological and structural attributes - leaving the lawn in need of constant watering and excessive feedings just to keep up its outward appearance. In a sense, it becomes addicted to these products that make it look better, but not become better. Gro-Well fertilizers offer targeted sustenance that goes to work exactly where it's needed - and when it's needed. In order to thrive, plant roots crave soil with a balance of air and moisture which Gro-Well fertilizers promote. The roots also need food that is easily absorbed. Our plant-based nutrients, AMINO-N™, (nutrients derived from the amino acid molecules of the corn) are absorbed directly into the roots.

Less maintenance means more time to enjoy your lawn.

Unlike fertilizers that create a "chemical" dependence, Gro-Well fertilizers allow your lawn to thrive on its own. Once you make the switch, over time, your lawn will become stronger, better, and more independent than when using 100% chemical fertilizers. Growth will be slow and steady, requiring less mowing. The blades will become stronger, needing less watering which helps the environment and your bottom line. What's more, you won't worry when children or pets roll in the grass or gaze at the stars on a bed of green because Gro-Well fertilizer is safer for you and for our environment. It's just nature improving upon nature... and that is what we strive for.
