1. PRODUCT AND COMPANY IDENTIFICATION

Product name: ACCOLADE HERBICIDE

Manufacturer: FMC Corporation
Agricultural Products Group
1735 Market Street
Philadelphia, PA 19103

General Information:
Phone: (215) 299-6000
E-Mail: msdsinfo@fmc.com

Emergency telephone number:
For leak, fire, spill or accident emergencies, call:
1 800 / 424 9300 (CHEMTREC - U.S.A.)
1 703 / 527 3887 (CHEMTREC - Collect - All Other Countries)
Medical Emergencies:
1 800 / 331-3148 (PROSAR - U.S.A. & Canada)
1 651 / 632-6793 (PROSAR - All Other Countries - Collect)

2. HAZARDS IDENTIFICATION

Appearance: brown
Physical state: Granules
Odor: sweet

Physical or Chemical Hazards: Powdered material may form explosive dust-air mixtures. Toxic fumes may be released in fire situations. Slipping hazard. product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Potential health effects:

Acute effects:
Eyes: May cause pain disproportionate to the level of irritation to eye tissues. Solid or dust may cause irritation or corneal injury due to mechanical action.
Skin: Brief contact is essentially nonirritating to skin. Prolonged contact may cause redness and irritation.
Inhalation: Vapors are unlikely due to physical properties. No adverse effects are anticipated from single exposure to dust. Based on available data, respiratory irritation was not observed.
Ingestion: Very low toxicity if swallowed. Harmful effects not anticipated from swallowing small amounts. Based on physical properties, not likely to be an aspiration hazard.

Chronic effects: For the active ingredient(s): in animals, effects have been reported on the liver and kidney.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous ingredients:

4. FIRST AID MEASURES

General advice
First aid responders should pay attention to self-protection and the recommended protective clothing (chemical resistant gloves, splash protection). If potential for exposure exists refer to Section 8 for specific personal protective equipment. Aside from the information presented below, no additional symptoms and effects are anticipated.

Eye contact
Hold eyes open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

Skin contact
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Inhalation
Move person to fresh air. If person is not breathing, call 911 (within the U.S. and Canada) or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Ingestion
No emergency medical treatment necessary.

Notes to physician
No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. Have the safety data sheet, product container and/or product label with you when calling a poison control center or doctor or going for treatment.

5. FIRE-FIGHTING MEASURES

Flash Point
No information available.

Sensitivity to Mechanical Impact
Not applicable

Sensitivity to Static Discharge
Fine dust dispersed in air, in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard

Suitable extinguishing media
Water. Dry chemical. Carbon dioxide (CO₂).

Hazardous combustion products
During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and/or irritating. Combustion products may include, but are not limited to, hydrogen fluoride, carbon monoxide, and carbon dioxide.

Specific hazards arising from the chemical
Do not permit dust to accumulate. When suspended in air, dust can pose an explosion hazard. Minimize ignition sources. If dust layers are exposed to elevated temperatures, spontaneous combustion may occur. Pneumatic conveying and other mechanical handling operations can generate combustible dust. To reduce the potential for dust explosions, electrically bond and ground equipment and do not permit dust to accumulate. Dust can be ignited by static discharge. Dense smoke is produced when product burns.

Protective equipment and precautions for firefighters
Keep people away. Isolate fire and deny unnecessary entry. Soak thoroughly with water to cool and prevent re-ignition. Cool surroundings with water to localize fire zone. Hand held dry chemical or carbon dioxide extinguishers may be used for small fires. Dust explosion hazard may result from forceful application of fire extinguishing agents. Contain fire water run-off if possible. Fire water run-off, if not contained, may cause environmental damage. Review the "Accidental Release Measures" and the "Ecological Information" sections of the (M)SDS. Wear self-contained breathing apparatus and protective suit. Wear fire/ flame resistant/ retardant clothing.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions
If spilled, take caution, as material can cause surfaces to become very slippery. Use personal protective equipment. For personal protection see section 8.

Environmental precautions
Prevent material from entering into soil, ditches, sewers, waterways, and/or groundwater. See Section 12, Ecological Information for more detailed information.

Methods for containment
Stop leak and contain spill if this can be done safely. Collect up the product. Pick up and transfer to properly labeled containers.

Methods for cleaning up
Shovel or sweep up. Pick up and transfer to properly labeled containers. Keep in suitable and closed containers for disposal. Clean contaminated surface thoroughly.

Other
For further clean-up instructions call FMC Emergency Hotline number listed in Section 1 "Product and Company Identification" above.

7. HANDLING AND STORAGE

Handling
Do not ingest. Avoid breathing dust. Avoid breathing vapors or mists. Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. Wash thoroughly after handling. Keep away from heat, sparks and open flame. No smoking. Dry powdered material can build static electricity when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmosphere. Handle in accordance with good industrial hygiene and safety practice. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from open flames, hot surfaces and sources of ignition.

Storage
Keep in a dry, cool and well-ventilated place. Keep away from open flames, hot surfaces and sources of ignition. Keep out of reach of children and animals. Store in original container only.

8. EXPOSURE CONTROL / PERSONAL PROTECTION

Exposure guidelines
This product does not contain any hazardous materials with occupational exposure limits established by the region specific regulatory bodies.

Occupational exposure controls

Engineering measures
Ensure adequate ventilation. Apply technical measures to comply with the occupational exposure limits. Use with local exhaust ventilation.

Personal Protective Equipment

General Information
If the product is used in mixtures, it is recommended that you contact the appropriate protective equipment suppliers. These recommendations apply to the product as supplied.

Respiratory protection
Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there no applicable exposure limit requirements or guidelines, wear respiratory protection when adverse effects, such as respiratory irritation or discomfort have been experienced, or where indicated by your risk assessment process. For most conditions, no respiratory protection should be needed; however, in dusty atmospheres, use an approved particulate respirator, such as an organic vapor cartridge with a particulate pre-filter.

Eye/face protection
Safety glasses with side-shields If there is a potential for exposure to particles which could cause eye discomfort, wear chemical goggles.
Skin and body protection
Wear suitable protective clothing. Skin and body protection. Minimize skin contamination by following good industrial hygiene practices.

Hand protection
Use gloves if extended exposure is anticipated. Wear suitable gloves: Neoprene gloves, PVC gloves.

Hygiene measures
General industrial hygiene practice. Wash hands before breaks and immediately after handling the product. Wash skin prior to eating, drinking, chewing gum or using tobacco.

10. STABILITY AND REACTIVITY

Stability
Stable under recommended storage conditions. Stable under normal handling and storage conditions. Hazardous polymerization does not occur.

Conditions to avoid
Exposure to elevated temperatures can cause product to decompose

Materials to avoid
None in particular

Hazardous decomposition products
Decomposition products depend upon temperature, air supply and the presence of other materials. Decomposition products can include and are not limited to carbon monoxide, carbon dioxide, hydrogen fluoride, and nitrogen oxides.

Hazardous polymerization
Hazardous polymerization does not occur.

11. TOXICOLOGICAL INFORMATION

Acute effects

Eye contact
May cause pain disproportionate to the level of irritation to eye tissues. Solid or dust may cause irritation or corneal injury due to mechanical action.

Skin contact
Brief contact is essentially nonirritating to skin. Prolonged contact may cause slight skin irritation with local redness.

LD50 Dermal
> 2000 mg/kg (rabbit). No deaths occurred at this concentration.

LD50 Oral
> 5000 mg/kg (Rat). No deaths occurred at this concentration.
LC50 Inhalation  > 5.15 mg/L 4 hr (Rat) (dust). No deaths occurred at this concentration.

Sensitization Did not cause sensitization on laboratory animals (guinea pig)

Chronic effects

Chronic Toxicity For the active ingredient(s): in animals, effects have been reported on the liver and kidney.

Mutagenicity For the active ingredients: In vitro genetic toxicity studies and animal genetic studies were both negative.

Reproductive toxicity In animal studies, the active ingredients did not interfere with reproduction.

Developmental Toxicity Flumetsulam did not cause birth defects or other effects in the fetus even at doses which caused toxic effects in the mother.

STOT - Repeated Exposure For the active ingredient(s): in animals, effects have been reported on the liver and kidney.

12. ECOLOGICAL INFORMATION

Marine pollutant Material is very highly toxic to aquatic organisms on an acute basis (LC50/EC50 <0.1 mg/L in the most sensitive species. Material is practically non-toxic to birds on an acute basis (LD50 > 2000 mg/kg).

<td>Not readily biodegradable</td>
</tr>
</tbody>
</table>

Persistence and degradability Flumetsulam: not readily biodegradable according to OECD/EEC guidelines. (Theoretical Oxygen Demand: 2.02 mg/mg.). Starch: Biodegradation may occur under aerobic conditions (in the presence of oxygen).

Bioaccumulation The active ingredients of this material have a very low bioaccumulation potential. BCF for flumetsulam is <100 or log Pow <3. No bioconcentration is expected from starch because of the relatively high molecular weight (>1000).
13. DISPOSAL CONSIDERATIONS

Waste disposal methods
Improper disposal of excess pesticide, spray mixture, or rinsate is prohibited. If these wastes cannot be disposed of by use according to label instructions, contact appropriate disposal authorities for guidance.

Contaminated packaging
Containers must be disposed of in accordance with local, state and federal regulations. Refer to the product label for container disposal instructions.

14. TRANSPORT INFORMATION

DOT
This material is not a hazardous material as defined by U.S. Department of Transportation at 49 CFR Parts 100 through 185.

Marine pollutant
Material is very highly toxic to aquatic organisms on an acute basis (LC50/EC50 < 0.1 mg/L in the most sensitive species. Material is practically non-toxic to birds on an acute basis (LD50 > 2000 mg/kg).

15. REGULATORY INFORMATION

U.S. Federal Regulations

SARA 313
Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). This product does not contain any chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372.

SARA 311/312 Hazard Categories
- Acute Health Hazard: yes
- Chronic Health Hazard: yes
- Fire Hazard: no
- Sudden Release of Pressure Hazard: no
- Reactive Hazard: no

CERCLA
This material, as supplied, does not contain any substances regulated as hazardous substances under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (40 CFR 302) or the Superfund Amendments and Reauthorization Act (SARA) (40 CFR 355). There may be specific reporting requirements at the local, regional, or state level pertaining to releases of this material.

International Regulations

Mexico - Grade
No information available

Canada
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS Hazard Class
not determined
