**Rabon™ 7.76 Oral Larvicide Pre-Mix**

To prevent the development of Horn flies, Face flies, House flies and Stable flies in the manure of treated cattle, House flies in the manure of treated swine, Horse flies and Stable flies in the manure of treated horses and House flies in the manure of treated mink.

**ACTIVE INGREDIENT:**
- Rabon® Insecticide – Contains 35 grams of RABON per pound.

**APPLICATION INSTRUCTIONS**

This product is not to be used to control stable flies. It is effective against horn flies, face flies, house flies and stable flies in the manure of treated cattle. It is also effective against horse flies and stable flies in the manure of treated horses. This product can be used to prepare mink feeds that will provide 70 mg of RABON per 100 lbs. of body weight daily.

START FEEDING MINK LARVICIDAL FEEDS EARLY IN THE SPRING BEFORE FLIES BEGIN TO APPEAR AND CONTINUE FEEDING THROUGHOUT THE SUMMER UNTIL HOUSE FLIES IN THE MANURE OF TREATED MINK CAN NO LONGER BE SEEN.

**APPLICATION INSTRUCTIONS (cont.)**

When fed to mink, RABON passes through the digestive system into the droppings where fly larvae are killed on contact shortly after the fly eggs hatch. This product can be mixed in mink feeds to prevent the development of house flies but should not be used as the sole method of control. It is recommended that appropriate pre-blending techniques be employed when mixing to assure uniform distribution and activity throughout the ration.

**METHOD OF FEEDING**

Add this product daily to the grain or concentrate portion of the horse’s diet to provide 70 mg of RABON 7.76 per 100 lbs. of body weight.

**STORAGE AND DISPOSAL**

- Store in a cool, dry place.
- Keep out of reach of children and pets.
- Do not apply directly to water, or to areas where surface water is present.
- Do not apply directly to intertidal areas below the mean high water mark.
- Follow the label instructions carefully.

**FIRST AID**

- IF IN EYES: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow.
- IF INhaled: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a poison control center or doctor immediately for treatment advice.
- IF INGESTED: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

- Chemical splash suit (as needed) for personnel handling the product directly.
- Rubber gloves, as needed, to prevent skin contact with the product.
- Respirator with organic vapor cartridges as needed to prevent inhalation of the product vapor.
- Safety glasses and/or goggles to prevent eye contact with the product.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

- RABON Insecticide – Contains 35 grams of RABON per pound.

**GENERAL INFORMATION**

- This product is not to be used to control stable flies. It is effective against horn flies, face flies, house flies and stable flies in the manure of treated cattle. It is also effective against horse flies and stable flies in the manure of treated horses. This product can be used to prepare mink feeds that will provide 70 mg of RABON per 100 lbs. of body weight daily.

**PACKAGING**
