HBV and HCV are inactivated after a 10 minute contact time. Use a 10 minute contact time for other viruses, fungi and bacteria listed. For Heavy Duty Cleaning and/or Odor Control: When greater cleaning is desired, use 4 - 8oz. of this product per gallon of water. Heavily soiled surfaces may require cleaning before disinfection.

For cleaning and disinfecting hard nonporous surfaces: equipment used for animal food or water, utensils, cages, kennels, stables, catteries, etc. Remove all animals and feed from premises, animal handling and restraining equipment, forks, shovels, etc. Immerse all animal handling and restraining equipment as well as forks, shovels, etc.

*Virucidal

For Human Coronavirus, treated surfaces must remain wet for 1 minute. Wipe dry with a clean cloth, sponge or mop or allow to air dry. Note: For disinfection of surfaces in contact with body fluids, surfaces must be wetted for 1 minute. If treated surfaces come into contact with body fluids, treated surfaces must remain wet for 1 minute. After the first 5 minutes, if treated surfaces come into contact with body fluids, treated surfaces must remain wet for 1 minute.

**Bacterial Stabilization of Use-Dilution:**

For Human Coronavirus, treated surfaces must remain wet for 1 minute. Wipe dry with a clean cloth, sponge or mop or allow to air dry.

**Viralid* *

For Human Coronavirus, treated surfaces must remain wet for 1 minute. Wipe dry with a clean cloth, sponge or mop or allow to air dry.

*Virucidal

For Human Coronavirus, treated surfaces must remain wet for 1 minute. Wipe dry with a clean cloth, sponge or mop or allow to air dry.
