This product is designed to carry germs, bacteria, viruses, fungi, spores, and toxic organic materials. It is to be applied to make surfaces safe after removing organic materials and waste. Directions for use: After applying, allow to remain on the surface for at least 10 minutes. Remove, rinse, and dry with paper towels.

**General Precautions:**
- Use in a well-ventilated area.
- Avoid contact with eyes, mouth, and skin.
- Wear gloves and protective clothing.
- Keep out of reach of children.

**Inhalation:**
- Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration.
- DO NOT give anything by mouth to an unconscious person.

**Eye Contact:**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present and easy to remove, before rinse.

**Skin Contact:**
- Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

**Ingestion:**
- If on skin or clothing:
  - Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

**Storage and Disposal:**
- Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children.

**Hazardous Waste Considerations:**
- If the material is contained, the material then moved into containers and disposed of by approved methods for hazardous wastes.
- Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container promptly after emptying.
- Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children.

**HOSPITAL DISINFECTION**
- For disinfection of pre-cleaned poultry equipment (brooders, watering founts, etc.), this product is effective against Staphylococcus aureus (VISA), as well as the organisms listed under the GENERAL DISINFECTION section.

- For disinfection of pre-cleaned public eating establishment surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, bathrooms, shower stalls, bathtubs, cabinets, tables, chairs, and telephones.

**QUATERNARY SANITIZER**

Disinfectant, Sanitizer, Deodorizer, *Virusicide, Mildewstat (on hard non-porous, inanimate surfaces)*

**DIRECTIONS FOR USE**

To sanitize pre-cleaned public eating establishment surfaces (counters, tables, finished wood or plastic cutting boards), apply a 200-400 ppm active quaternary solution for at least 60 seconds making sure to immerse completely. Remove items, drain the use-solution from the surface and air dry. Do not rinse.

To sanitize pre-cleaned mobile items in public eating establishments, apply a 200-400 ppm active quaternary solution by adding 1-2 ounces of this product to 4 gallons of water, 2.5-5 ounces to 10 gallons of water or 5-10 ounces to 20 gallons of water.

**To sanitize pre-cleaned and potable water-rinsed, non-porous, public eating establishment and dairy food contact surfaces,**

- To sanitize pre-cleaned and potable water-rinsed, non-porous, public eating establishment and dairy food contact surfaces, this product is an effective sanitizer against Klebsiella pneumoniae at a 200 ppm active quaternary concentration when diluted in water up to 500 ppm hardness (CaCO3). At an active quaternary concentration of 300 ppm, it is an effective sanitizer against Klebsiella pneumoniae when diluted in water up to 650 ppm hardness (CaCO3).
